Subject: Letter from USEPA to Zuckerman Company re: Master Metals, Inc. Superfund
Site, Administrative Order by Consent and Scope of Work

Dear Kris:

As we discussed by phone, I have erroneously been sent the letter regarding the above subject. Our company name is *not* Zuckerman Company and we are not involved with any business dealings that relate to production - metal, lead, or otherwise. I assume there is another company nearby with a name similar to mine.

We are a management consulting company. We have been in business for almost ten years and we have always provided business planning, strategic planning, and organizational development services. We have never produced lead. In fact, we've never produced a metal product, nor any product for that matter. In addition, I have never heard of the Superfund Site mentioned in the referenced letter.

Based on our two phone conversations and this letter, I assume that you will not expect any other response from me or my company.

Sincerely,

Laurie B. Zuckerman
President
